

Table of Contents

CHAPTER 1: QUICK REFERENCES

Vascular Images.....	2
Nasal Anatomy	3
Trigeminal Nerve.....	5

CHAPTER 2: OMS PAPERWORK

History and Physical Examination	8
Neurologic Evaluation	12
Glasgow Coma Scale.....	12
Cranial Nerves.....	13
Admission Orders	13
Progress Notes	15
ICU Progress Notes.....	16
Preoperative Notes.....	17
Operative Notes.....	18
Postoperative Orders	19
Night of Surgery (NOS) Notes.....	20
Discharge Notes.....	20
Sedation Progress Notes.....	21
References.....	22

CHAPTER 3: LABORATORY VALUES AND FORMULAS

Fluids.....	24
Fluid Compartments	24
Water Balance	24
Baseline Fluid Requirements.....	25
Daily Body Fluids	25
Composition of Parenteral Fluids.....	26
Specific Replacement Fluids	27
Ascitic/Pleural Fluids	28
Electrolytes	29
Sodium.....	29
Potassium.....	31
Chloride	33
Calcium.....	33

Magnesium	34
Phosphorus.....	35
Glucose	36
Blood Gas Analysis	36
Components	36
7 Steps to ABG Interpretation.....	37
Acid-Base Equilibrium.....	38
Differential Diagnosis	40
Coagulation.....	42
Coagulation Cascades.....	42
Measurement	43
Transfusion of Blood Products.....	43
Hematology.....	45
Normal Values.....	45
Urinalysis	46
Normal Values.....	46
Urine Values.....	47
Formulas	47
Causes of Fever.....	48
References.....	49

CHAPTER 4: COMMON OPERATIONS

Coronal Approach.....	52
Preauricular Approach	53
Submandibular (Risdon) Approach	55
Transconjunctival Approach to the Orbital Floor and Rim.....	57
Subciliary Approach to the Orbital Floor and Rim.....	58
Upper Eyelid Approach to the Superolateral Orbital Rim	59
Supraorbital Lateral Brow Approach	60
Le Fort I Osteotomy	61
Bilateral Sagittal Split Osteotomy	64
Intraoral Vertical Ramus Osteotomy	66
Genioplasty	67
Sublingual Gland Excision (Ranula Excision).....	69
Cricothyrotomy	70
Tracheostomy.....	70
Anterior Iliac Crestal Bone Graft	72

Tibia Bone Graft (Lateral Approach)	73
References	74

**CHAPTER 5: OUTPATIENT SEDATION
AND GENERAL ANESTHESIA**

Definitions.....	78
Stages of General Anesthesia	79
Preoperative Evaluation	80
ASA Physical Status Classification.....	80
Preoperative Fasting Recommendations	81
Recommended Preoperative Laboratory Studies	81
Pregnancy Considerations.....	82
Cardiovascular Assessment	83
Cardiac Risk Stratification for Noncardiac Surgical Procedures.....	83
Interventions to Reduce Perioperative Cardiac Complications	86
Duke Activity Status Index	87
Airway Evaluation	87
Mallampati Classification.....	88
Cormack and Lehane Laryngoscopic View Grades.....	89
Pediatric Airway Considerations.....	89
Airway Evaluation Definitions.....	90
Guidelines for Infective Endocarditis.....	91
AHA Infective Endocarditis Prophylaxis Regimes.....	91
Suggested Operating Room Setup	92
Monitoring	93
Visual Observation Methods	94
Brainstem Function	94
Baseline Determinations.....	95
Monitoring of Specific Functions	95
Recording of Specific Monitoring Parameters.....	96
Anesthesia Equipment	98
Endotracheal Tubes/Airway Management	98
Mechanical Ventilation.....	99
Indications	99
Pressure-Controlled Ventilation	99
Volume-Controlled Ventilation.....	99
Modes of Ventilation.....	99
Measures of Ventilation	100

Noninvasive Ventilation.....	100
Initial Ventilator Settings	101
Ventilator Dynamics.....	101
Weaning Criteria	101
Weaning Techniques	102
Lung Volumes	102
Capnograph.....	103
Discharge Criteria.....	104
Modified Aldrete Patient Discharge Scoring	104
Malignant Hyperthermia (MH).....	105
Drug Association	105
Management of MH Susceptible Patients	106
Laryngospasm	109
Bronchospasm.....	111
Anaphylaxis	113
References.....	114

CHAPTER 6: DENTOALVEOLAR SURGERY

Classifications and Codes for Third Molars.....	118
Pell & Gregory Classification of Impacted Mandibular Third Molar Teeth.....	118
Pell & Gregory Classification of Impacted Maxillary Third Molar Teeth.....	118
Winter Classification of Impacted Third Molars	119
American Dental Association Definitions.....	119
Extraction Site Healing Progression.....	119
Associated Conditions	120
Pericoronitis.....	120
Lingual Nerve in the Third Molar Area	141
Complications of Dentoalveolar Procedures	141
Alveolar Osteitis (Dry Socket).....	141
Root Fragments and Root Tips	122
Root Displacement	122
Postoperative Bleeding.....	124
Periodontal Defect.....	125
Nerve Dysfunction.....	125
Impacted Teeth Other Than Third Molars.....	126
The Natural History of Third Molars	126

Periodontal Considerations in Third Molar Removal	127
The Microflora around the Second and Third Molars.....	128
The Effects of Age on Various Parameters Relating to Third Molars.....	128
Orthodontic and Prosthodontic Considerations in the Removal of Third Molars.....	129
Current Imaging Techniques	129
General Technique of Third Molar Removal	130
The Possible Role of Coronectomy in Third Molar Treatment	132
The Role of Lingual Flap Elevation and Lingual Retraction in the Management of Third Molars	132
Can/Should Anything Be Placed in the Socket Following Third Molar Removal?	133
Nerve Damage – Prevention, Evaluation and Management in Relation to Third Molars	133
References.....	134

CHAPTER 7: DENTAL IMPLANT SURGERY

Background.....	138
Treatment Planning.....	138
Patient Evaluation.....	138
Patient Chief Concerns and Expectations	138
Type of Prosthesis	139
Esthetic Evaluation.....	139
Periodontal Biotype Evaluation.....	140
Edentulous Space or Ridge Evaluation.....	140
Soft Tissue Evaluation.....	141
Potential of Creating or Preserving Papilla.....	141
Hard Tissue Evaluation	142
Residual Ridge Form.....	142
Radiographic Evaluation	143
Computed Tomographic Scan (Cone Beam CT)	143
CBCT Guided Surgery	144
Diagnostic Casts	144
Use of Surgical Guides.....	144
Definitions of Dental Implant Restoration.....	145
Preparing the Implant Site.....	145
Surgical Periodontal Therapy.....	145

Correction of Deficient Osseous Support	146
Alveolar Distraction Osteogenesis	147
Socket Preservation.....	148
Algorithm.....	149
Immediate Implant Placement.....	149
Delayed Implant Placement.....	149
Flap Design Considerations.....	149
Inferior Alveolar Nerve Repositioning	152
Surgical Protocol.....	152
Preoperatively.....	152
Atraumatic Drilling	152
Postoperative Care.....	153
General Considerations for Implant Placement.....	154
Anterior-Posterior (AP) Spread.....	156
All-on-4	156
Short Implants	156
Vascularized Grafts	157
Zygomatic Implants.....	157
1 Stage Placement.....	158
2 Stage Placement.....	158
Abutments.....	159
Screw Retained.....	159
Cement Retained	159
Platform Switching.....	159
Immediate Loading.....	159
Criteria for Success	160
Complications	161
Soft Tissue Complications.....	161
Bony Complications	162
Ailing or Failing Implant.....	162
Implant Loss	163
Marginal Bone Loss Over Time.....	164
Periimplant Soft Tissue Complication	164
References.....	165

**CHAPTER 8: ORTHOGNATHIC/OBSTRUCTIVE SLEEP APNEA/
CLEFT AND CRANIOFACIAL SURGERY**

Pertinent Anatomy	170
Maxilla.....	170
Mandible.....	171
Hierarchy of Stability in Orthognathic Surgery	171
Overview of Surgical Procedures	172
Le Fort	172
Bilateral Sagittal Split Osteotomy (BSSO).....	173
Sequencing of Maxillo-Mandibular Surgery.....	174
Mandible First Surgery Consideration	174
Evaluation of Dentofacial Deformities (DFD).....	174
DFD I Appointment.....	174
DFD II Appointment	175
Presurgical Treatment	175
Virtual Planning in Orthognathics.....	176
Advantages Compared to Conventional Planning	177
Disadvantages Compared to Conventional Planning.....	177
Traditional Model Surgery vs. 3D Planning	177
Timeline for 3D Planning.....	179
Obstructive Sleep Apnea (OSA).....	180
Definitions	180
Respiratory Disturbance Index (RDI)	180
Epworth Sleepiness Score	180
Fujita Classification of OSA Obstructive Locations.....	180
Diagnosis	180
Cephalometric Analysis.....	181
Non-Surgical Management.....	181
Surgical Management.....	182
Distraction Osteogenesis.....	183
Indications	183
Effects on Surrounding Soft Tissue	183
Biologic Basis.....	184
Procedure	184
Cleft Lip and Palate	185
Epidemiology.....	185
Genetics	186
Cleft Lip Nasal Deformity Features.....	186

Classifications of Clefts.....	187
Lip Closure Options	189
Palate Closure Options	191
Velopharyngeal Incompetence (VPI).....	193
Surgical Treatment Staging	193
Craniosynostosis	194
Trigonocephaly	194
Brachycephaly	194
Scaphocephaly	194
Anterior Plagiocephaly	194
Posterior Plagiocephaly	195
Cloverleaf Skull.....	195
Craniofacial Dysostosis	196
Treatment Plan.....	196
Craniofacial Syndromes/Anomalies	167
Treacher Collins	197
Craniofacial Microsomia	197
Other Common Syndromes	199
References.....	200

CHAPTER 9: TRAUMA/EMERGENCIES

Essentials of Advanced Trauma Life Support.....	204
History	204
Primary Survey	204
Resuscitation.....	204
Adjuncts to Primary Survey and Resuscitation.....	204
Secondary Survey, Total Patient Evaluation, Physical Examination, and History	205
Adjuncts to Secondary Survey	206
Definitive Care	206
Transfer.....	206
Secondary Survey of Systems	207
Estimated Fluid and Blood Losses	211
Emergencies	212
Septal Hematoma.....	212
Infections With Rapidly Progressing Loss of Airway	212
Action Plan	212
Orbit Injuries.....	213

Retrobulbar Hematoma	213
Superior Orbital Fissure Syndrome.....	213
Orbital Apex Syndrome.....	214
Cavernous Sinus Syndrome.....	214
Sinus Injuries	214
Frontal Sinus Fractures.....	214
Anterior Table Fracture Only.....	214
Posterior Table Fracture	214
Management of Frontal Sinus Fractures Algorithm.....	215
Dental Injuries.....	216
Lacerations and Soft Tissue Injuries	217
Classification of Wounds	217
Wound Types.....	217
Wound Conditions.....	217
Basic Guidelines for Repair of Facial Wounds.....	217
Lacerations in Special Anatomical Areas/Structures	218
Scalp Injuries	218
Eyelid Injuries	219
Nasolacrimal System Injuries.....	219
Nasal Injuries.....	220
Epistaxis.....	220
Ear Injuries	222
Lip Injuries	222
Oral Mucosa and Tongue Injuries.....	223
Parotid Injuries	223
Animal and Human Bite Injuries	224
Fractures of the Maxillofacial Skeleton	224
Nasal Fractures	224
Orbital Wall, Roof, and Floor Fractures	225
Zygomaxillary Complex (ZMC) Fractures	226
Naso-Orbital-Ethmoidal (NEO) Fractures	229
Maxillary Fractures	232
Mandibular Fractures.....	234
Medical Cardiac Emergencies	236
Adult Bradycardia (with Pulse).....	236
Adult Tachycardia (with Pulse).....	237
Adult Cardiac Arrest	238
Adult BLS HCP.....	239

Pediatric Bradycardia (with Pulse).....	240
Pediatric Tachycardia (with Pulse and Poor Perfusion).....	241
Pediatric Cardiac Arrest	242
Pediatric BLS HCP.....	243
Other Emergencies Checklist	244
Sutures.....	248
Characteristics of Absorbable Suture Material	248
Characteristics of Nonabsorbable Suture Material.....	252
References.....	254

CHAPTER 10: DIAGNOSIS AND MANAGEMENT OF TMJ

Temporomandibular Joint (TMJ) Anatomy	258
Imaging Techniques.....	258
Panoramic View	258
Lateral Tomogram.....	258
Computed Tomography and CBCT	259
Magnetic Resonance Imaging	259
Other Adjunctive Imaging Modalities.....	259
Wilke Staging of Internal Derangement of the TMJ.....	259
Goals of TMJ Surgery	260
Procedures.....	260
Arthrocentesis.....	260
Arthroscopy	261
Disk Repositioning Procedures	261
Reparative Disk Procedures	262
Total Discectomy	262
Disk Replacement.....	262
Temporalis Muscle Flap.....	262
Auricular Cartilage Graft	263
Dermal Graft	263
Abdominal Dermis Fat Graft	263
Alloplast Materials	263
Condylectomy/Total Joint Reconstruction.....	263
Indications	263
General Considerations	264
Costochondral Graft	264
Alloplast Materials	264
1 Stage vs. 2 Stage TMJ Replacement for Custom Joints.....	264

Hypermobility	265
Complications of Surgery	265
References	266

CHAPTER 11: DIAGNOSIS AND MANAGEMENT OF PATHOLOGIC CONDITIONS

Differential Diagnosis	270
Soft Tissue Lesions	270
Midline Neck Masses	272
Lateral Neck Masses	272
Bony Lesions	272
Cysts and Tumors of the Jaws	275
Histology of Common Lesions	275
Current Classification of Jaw Cysts	278
Odontogenic and Nonodontogenic Tumors of the Jaws	278
Head and Neck Oncology	279
Staging for Carcinoma of the Lip and Oral Cavity	279
Staging of Oral Cavity Cancer	280
Memorial Sloan-Kettering Cancer Center System	281
Suggested Investigations at Time of First Appointment	282
Commonly Used Imaging Modalities for Staging	282
Critical Radiologic Features Affecting Selection of Treatment	282
Oral Squamous Cell Carcinoma	282
Basal Cell Carcinoma	283
Melanoma	284
Salivary Gland Lesions	284
Common Benign Salivary Gland Tumors	284
Common Malignant Salivary Gland Tumors	284
Medications Used in Treatment of Various Cancers	285
Medication Related Osteonecrosis of the Jaw (MRONJ)	285
Antiresorptive Preparations Commonly Used in the US	286
Bisphosphonate Therapy	287
Bisphosphonate Mechanism of Action	287
Risk Factors	287
Treatment Recommendations	288
Clinical Findings of Medication Related Osteonecrosis	289
Osteoradionecrosis	290

Hyperbaric Oxygen Therapy291
References.....292

CHAPTER 12: RECONSTRUCTIVE SURGERY

Defect Classification.....296
 Mandibular Defects296
 Maxillary Defects267
 Soft Tissue Grafts298
 Split-Thickness Skin Grafts.....298
 Full Thickness Skin Grafts.....298
 Graft Site Healing.....298
 Donor Site Healing.....299
 Contraction299
 Reasons for Skin Graft Failure.....299
 Hard Tissue Grafts.....299
 Bone Grafting Principles299
 Criteria for Success of Maxillofacial Bone Reconstruction.....300
 Intraoral Grafts.....300
 Mandibular Block Grafts.....300
 Anterior Iliac Crest Bone Graft.....301
 Posterior Iliac Crest Bone Graft.....303
 Costochondral Graft304
 Tibial Bone Graft.....305
 Calvarial Bone Graft306
 Common Regional Pedicled Flaps308
 Common Free Vascularized Flaps.....313
 Muscle and Myocutaneous.....313
 Fascial and Fasciocutaneous314
 Composite.....315
 Techniques for Increased Flap Survival.....318
 Flap Monitoring.....318
 Leech Therapy320
 References.....321

CHAPTER 13: COSMETIC MAXILLOFACIAL SURGERY

Anatomy and Esthetic Evaluation324
 Facial Photographs.....324

Frontal and/or Profile Evaluation	324
Face Height (Total Face Height Trichion to Menton)	324
Face Width.....	325
Evaluation of Individual Facial Units.....	326
Nine Facial Esthetic Units.....	326
Forehead.....	326
Eyes and Eyebrows	326
Cheeks	328
Ears.....	328
Nose.....	329
Lower Face.....	330
Expected Aging Process by Decades	331
Fitzpatrick Skin Tone Chart	332
Glogau Scale for Grading the Severity of Photoaging.....	333
Norwood Classification of Male Pattern Baldness.....	334
Ludwig Classification of Female Pattern Baldness.....	335
Sequencing of Surgical Procedures	335
Rhinoplasty.....	335
Otoplasty.....	339
Cervicoplasty	340
Brow Lift	342
Blepharoplasty.....	343
Rhytidectomy.....	345
Chemical Peels	346
Lasers.....	347
Resurfacing.....	348
Dermal Fillers.....	349
Botulinum Toxin Type A (Botox).....	350
Facial Implants	351
References.....	352

CHAPTER 14: NERVE INJURY

Nerve Anatomy.....	358
Nerve Injury Classification.....	359
Nerve Terminology.....	360
Trigeminal Nerve Injuries.....	361
Neurosensory Testing of the Trigeminal Nerve	363
Normal Values for Two Point Discrimination.....	364

Modified Medical Research Scale for Sensory Nerve Evaluation.....	366
Indications for Microneurosurgical Evaluation/Repair.....	367
Timeline for Surgical Intervention of Unobserved Injury	367
Management of Specific Observed Nerve Injury Conditions.....	367
Nerve Repair Techniques	368
Prognosis for Microneurosurgery.....	369
Postoperative Care.....	370
Sensory Re-Education	370
Facial Palsy Evaluation.....	370
Facial Nerve Components	372
House-Brackmann Facial Nerve Grading System	373
Differential Diagnosis	375
Bell Palsy.....	376
Facial Palsy Red Flags	377
Management of Traumatic Facial Paralysis.....	377
Facial Nerve Grafts	378
References.....	380

CHAPTER 15: MEDICAL MANAGEMENT

Acute Abdominal Pain.....	384
Differential Diagnosis	384
Right Upper Quadrant.....	384
Right Lower Quadrant	384
Epigastric.....	384
Umbilical.....	384
Suprapubic.....	385
Left Upper Quadrant	385
Left Lower Quadrant.....	385
Alcohol Facts	385
Hypertension	386
Shortness of Breath.....	388
Differential Diagnosis	388
Pulmonary	388
Cardiac	388
Anion Gap Metabolic Acidosis.....	388
Evaluation.....	389
Chest Pain	389
Differential Diagnosis	389

Cardiac	389
Pulmonary	389
Other.....	389
Evaluation.....	389
Chest X-Ray Films.....	390
Liver Disease	390
Assessment of Liver Synthetic Function.....	390
Other Liver Tests.....	390
Four Patterns of Liver Dysfunction.....	391
Hepatocellular Injury	391
Cholestasis and Obstruction.....	391
Isolated Hyperbilirubinemia.....	391
Infiltrative.....	392
Acute Liver Failure	392
Cirrhosis.....	392
Kidney Disease	393
Renal Failure	393
Renal Function Tests	393
Blood Urea Nitrogen (BUN).....	393
Plasma Creatinine.....	393
Acute Kidney Injury.....	393
Chronic Kidney Disease.....	394
Electrolyte Imbalance	394
Associated Problems	395
Anesthesia Management.....	395
Postoperative Management	395
Effects of Anesthetics on Renal Function.....	396
Inhaled Anesthetics	396
Direct Nephrotoxicity.....	396
Perioperative Concerns With Renal Failure and Dialysis Patient	396
Immunodeficiency	397
Factors Associated With Immune System Compromise.....	397
Diabetes Mellitus (DM).....	398
Insulin Characteristics	401
Dental/Surgical Management of the Pregnant Patient.....	402
Dental Treatment Timing	402
Patient Management Issues	402
Use of Radiation	403

Pharmacologic Considerations	404
Main Points of Consideration for Treating a Pregnant Patient	405
Medications to Avoid During Pregnancy	405
Medications to Avoid During Lactation	405
FDA Pregnancy Classifications With Respect to Potential Fetal Risk	406
References.....	407

CHAPTER 16: ORAL AND MAXILLOFACIAL INFECTIONS

Maxillofacial and Fascial Space Infections	410
Relevant Surgical Anatomy.....	410
Simple Odontogenic Infections.....	419
Complex Odontogenic Infections.....	419
Immunocompromising Conditions	419
Eight Steps in the Management of Severe Head and Neck Infections.....	419
Indications for Hospitalization	419
Extraoral Incision Sites for Drainage of Following Head and Neck Infections	421
Empiric Therapy for OMS Infections.....	422
Ludwig’s Angina	423
Criteria for Hospital Discharge	424
Practical Tips for Management of Head and Neck Infections.....	424
Animal and Human Bites	425
Sepsis	427
Systemic Inflammatory Response Syndrome (SIRS)	427
Sepsis	427
Severe Sepsis	427
Septic Shock	428
Acute Respiratory Distress Syndrome	428
Organ Dysfunction Criteria	429
Management of Sepsis and Septic Shock.....	430
Antimicrobial Prophylaxis for Bacterial Endocarditis	431
Prophylaxis for Patients With Total Joint Replacement Prosthesis.....	433
References.....	434

CHAPTER 17: PHARMACOLOGY

Pharmacology of Medications Commonly Used in OMS.....438
 Commonly Used Preoperative Medications.....438
 Local Anesthesia.....439
 Dosages for Commonly Used Local Anesthetics.....439
 Local Anesthetic Precautions440
 Overdose.....441
 Treatment.....441
 Warnings.....441
 IV Sedation442
 Benzodiazepines442
 Barbiturates.....442
 Other442
 Inhalation Anesthetics.....443
 Tissue Group Composition445
 Nonvolatile Anesthetic Agents445
 Commonly Used Opioids446
 Commonly Used Muscle Relaxants446
 Cholinesterase Inhibitors447
 Common Postoperative Medications448
 Pediatric Sedation449
 Antibiotics.....452
 Main Categories.....453
 Major Adverse Effects.....460
 Dosage Guidelines.....462
 References.....464

INDEX

A-Z Index.....465
