### The Safe Use and Disposal of Prescription Medications

**Safety Tips**

- Take your medication only as directed.
- Carefully note the time a medication was administered and consider writing it down.
- Do not cut pills in half or crush them to make them easier to swallow. This can change the way the medication is released into your system and can have serious consequences.
- Never share your medication with someone else, as this is illegal.
- Do not take more than prescribed, even if pain relief is less than desirable. This could result in an accidental overdose especially when you are new to a medication.
- Store medication in a safe place that only you can access:
  - In a locked drawer
  - On high shelf
  - In a lock box or home safe
- Keep all medicines out of the reach of children and pets.
- Keep medications in their original packaging until you are ready to take them.
- If you see or experience any of the following symptoms, get emergency help right away:
  - Slow heartbeat
  - Trouble breathing or slow, shallow breathing
  - Severe sleepiness
  - Cold, clammy skin
  - Lassitude
  - Dizziness
  - Confused thinking
  - Trouble walking or talking normally
  - Seizure
  - Hallucinations
  - Unusual sweating

Parents and guardians should administer the medication as directed to ensure patient safety and to avoid misuse.

Remember, medications are safe and effective when used as directed and under the care of a professional.
